

VIDEO COLLABORATION FOR WORK FROM HOME EMPLOYEES

Meet Jenny

Wearing many hats – a wife, mother, manager, fitness enthusiast, dog lover – Jenny is a remote employee that relies on Logitech video collaboration solutions to power through her weekdays. Her personal workspace solutions enable Jenny to:

- ✓ Enrich collaboration with co-workers
- ✓ Increase productivity during her workday
- ✓ Improve her user experience with tools that get the job done
- ✓ Feel engaged and connected anywhere, anytime

5:30 AM

An early riser, Jenny starts her morning off with a 30-minute yoga session. This activity mentally prepares her for the day, as she transitions first into mommy mode to get schoolwork prepared for her children, breakfast on the table and the entire household ready for the upcoming day.

7:18 AM

Jenny receives a notification from Patrick, a London-based co-worker. Using her Logitech Zone Wireless Plus headset with a collaboration platform installed on her mobile phone, Jenny initiates a call to bring Patrick up to speed on a strategic initiative while putting the finishing touches on breakfast.

9:00 AM

Starting her first client meeting, Jenny connects over a video meeting, enabling her to establish a relationship and build trust by seeing meeting participants in real-time. She appreciates her Logitech Brio webcam's RightLight technology for the confidence that she'll look professional in any lighting condition.

12:00 PM

Using her Logitech Brio and Zone Wireless Plus, Jenny doesn't miss a beat when hosting an end-customer webinar. Her headset's Active Noise Cancellation keeps her focused and its advanced noise canceling microphone enables Jenny to deliver the message clearly regardless of distractions in the background.

2:45 PM

Jenny schedules breaks every 2-3 hours to reset. On this breezy spring day, Jenny and her family head outside for fresh air. While on a walk, Jenny is struck with a revelation, an idea that will alter the course of one project and give rise to an exciting new one. It's a reminder that great ideas don't happen in a cubicle!

4:30 PM

Jenny ends her day with a video interview. Using her Logitech workday heroes (the Brio and Zone Wireless Plus) she is able to humanize the interview with a potential candidate. Jenny appreciates Logitech's video collaboration solutions that provide her with the right tools to recruit a team of talent based anywhere around the globe.
